CSI
Circular Stapler Introducer
CSI25 Bariatric | CSI31 Colon

For Safe and Smooth Introduction of Circular Staplers
The CSI “Circular Stapler Introducer” device will assure a sliding introduction of the Circular Stapler in Bariatric Surgery enhancing safety and swiftness of laparoscopic Roux-en-Y Gastric Bypass.

CSI25 Bariatric

The CSI25 Bariatric is placed on the circular stapler head of 25 mm diameter to protect tissue from the edges of the stapler device and enable safe and easy introduction through the abdominal wall and into the jejunum for Roux-en-Y Gastric Bypass.

After safe and smooth introduction into the jejunum, the CSI25 Bariatric can be pulled back over the stapler head on the attached plastic thread.

By pulling the CSI25 Bariatric further backwards, the released CSI25 is placed on the stapler shaft without interfering with the application of the circular stapler and safety of the anastomosis. Now the anastomosis can be performed as usual.

Advances in circular stapling techniques for gastric bypass: the circular stapler introducer
The CSI “Circular Stapler Introducer” facilitates the use of Circular Stapler when performing double-stapling technique in Colon Surgery.

CSI31 Colon

The CSI31 Colon is placed on a circular stapler with a 28, 29, 31 or 33 mm head to perform easy introduction to protect the anal sphincter and enable an easy and safe placement of the Circular Stapler head to the staple line to perform a double stapling technique.

After safe and smooth introduction through the anal sphincter and placing the CSI31 Colon covering the stapler head to the staple line, the CSI31 Colon can be released by pulling the attached plastic band. The predetermined breaking points open so that the stapler head is free again.

By pulling the CSI31 Colon further backwards, the released CSI31 Colon is placed on the stapler shaft without interfering with the application of the circular stapler and safety of the anastomosis. Now the anastomosis can be performed as usual. The Circular Stapler together with the CSI31 Colon can then be withdrawn as normal.

CSI25 Bariatric

CSI31 Colon

The CSI facilitates the insertion of the circular stapler not only through the abdominal wall but also into the abdomen and then into the jejunum (CSI25 Bariatric) or Colon (CSI31 Colon) enhancing safety and swiftness of laparoscopic Roux-en-Y Gastric Bypass or circular anastomosis in Colon Surgery.
