

**LAGIS<sup>®</sup>**

# LAGIPIORT<sup>®</sup>

For Effective Specimen Retrieval, Extracorporeal Anastomosis and Single Incision Surgeries!!

- + Integrated seal system does not require trocar use, eliminating possible interference of trocar cannulas in the abdominal cavity
- + Removable seal cap makes it easy to extract large specimens without removing the device
- + Offers unmatched articulation, permitting use of standard laparoscopic instrumentation
- + Maintains pneumoperitoneum for continuous access and visualization
- + Accommodates 1.5cm to 3.5cm incisions and varied abdominal wall thickness for wide spectrum of procedures
- + Reduces the risk of wound infections

*health* **care** partner GmbH

**Laparoscopic Cap**

**Removable Cap for Easy Specimen Retrieval**

- + Enables a laparoscopic approach before and after specimen retrieval
- + Multi ports of 5mm, 12mm and 15mm seal enable use of a wide range of instrumentation
- + Integrated seal system eliminates the need for trocars
- + Accommodates straight, bent, angled, or curved instrumentation

LAGIS LapShield™  
Wound Protector/Retractor

**360° Atraumatic Retraction & Wound Protection**

- + Distributes force evenly for optimal field of view
- + Allows for maximum exposure with a minimum incision size
- + Allows visualization of wound margins
- + Soft materials and evenly dispersed tension promote patient post-operative comfort.

**Greater Exposure**

- + 360° of elastic tension maximizes working area providing
- + significantly greater exposure

**Easily Placed and Removed**

- + Inserted in seconds. Flexible ring slips gently into incision

**Significantly decreases wound infection**

- + Helps protect wound from contamination while helping to keep wound edges moist.

Product Code	Numbers of Ports		Incision Length
	5 mm	5-12 mm	
TRL-0110R	1	1	1.5 - 3.5 cm
TRL-0210R	2	1	
TRL-0220R	2	2	
TRL-0310R	3	1
